

Saudi Board in Restorative Dentistry SBRD

Introduction

The Saudi Board in Restorative Dentistry SBRD launched in October 1999. It is designed to provide didactic, clinical and hospital training to upgrade the level of dental profession in Saudi Arabia. The training provided in program prepare residents to be highly qualified restorative dentists who are able to treat complex restorative and esthetic cases.

Vision

Global leadership in medical education, training, and community services in the field of restorative dentistry to achieve the vision of Saudi Arabia 2030.

Mission

Building promising competencies with a lifelong ability to learn and provide a human-centered care in the field of restorative dentistry, using the latest technology and evidence-based knowledge.

Values

- Professionalism.
- Quality.
- Patient safety.
- Human-centered care.
- Cooperation.
- Transparency.
- Empathy.

Goals

Supply the community with qualified dental restorative specialists

To provide a designated training program for dental restorative specialists and related professions.

To maintain an environment of excellence for residents and apply the measures required for academic success as well as clinical achievement.

To offer the advanced techniques and modern technology required for oral health research and other related scientific endeavors.

To provide consulting dental restorative services for local as well as international agencies.

Program framework :

- The SBRD is a program that runs for a period of 3 years.
- Didactic clinical sciences and advanced clinical training integrated into the program.
- Documentation of progress in the program and all resident activities must be maintained by the program director and available for review.
- Comprehensive restorative dental care is divided into two parts: junior residency (the first 2 years), which is dependent (under supervision), and senior residency after passing the Part 1 examination (the final year), which is independent.

Application Process:

The application is submitted for Saudi Board certification program In four stages:

1. Applying:

A special account is created in the admission system of the Saudi Commission for Health Specialties to apply for board certification programs. Submitting the application goes through the following stages:

- a) The stage of choosing desires (specialization, city)
- b) CV building stage.
- c) Final order delivery stage.
- d) Verification stage.

2. Nomination:

At this stage, the list of candidates who could be nominated for personal interviews in the centers will be announced. During personal interviews, the candidate can express his interest in the training center.

3. Acceptance & Matching stage:

After nomination comes the acceptance stage, which goes through three stages as follows:

- a) The period of personal interviews.
- b) Create a list of priority positions.
- c) Matching results.

4. Registration stage:

After completing the matching and acceptance stage, the registration procedures must be completed by completing the following procedures within the time period specified in the timetable:

- . Pay the program admission fees through the available payment methods.
- . A valid professional classification and registration according to the accepted professional field.

- . Uploading the certificate of completion of the internship year.
- . Submitting a letter of delegation to the accepted person sent by the trainee's sponsor.
- . In the absence of a scholarship, the training center must agree to accept training and trainee is responsible for training fees.
